SCREENS & GUARDS

COUGHS AND SNEEZES SPREAD DISEASES!

Help To Slow
the spread of airborne infectious pathogens

officechoice™
Consider it sorted.

Physical barriers when used in conjunction with other sensible strategies like hand hygiene, distancing where possible and mask wearing can help to slow the spread of airborne infectious pathogens. They serve as a visual reminder to practice prudent prevention.

We use commercial quality clear acrylic, it is the ideal material for desktop or countertop screening, less brittle than glass, more scratch resistant and rigid than PETG and optically clear to aid visual communication while offering protection and peace of mind. We use a translucent dual layer Polycarbonate where some privacy is preferred.

- ▶ Quick to assemble without tools
- ▶ Crystal clear optics
- ▶ Easy to clean, easy to maintain
- ▶ Easy to sanitise
- ▶ Flat packed, with protective film in place (simply peel off)
- ▶ Rounded corners
- ▶ Flame polished edges
- ▶ Tough commercial grade acrylic
- ▶ Shatter-resistant
- ▶ Scratch-resistant

Consider it sorted.
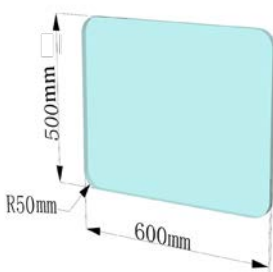

INTERDESK ACRYLIC SCREENS

The move towards collaborative and compact team based desking has been relentless over the last few years, but that same closeness is now being seen as a liability. People are nervous about being too close. Interdesk screens provide a sensible and easy solution to getting your team back to work. They provide a physical barrier but still retain peripheral visual contact. They also act as a reminder to not share equipment and allow workers to feel more at ease in the new workplace. Rounded corners and smoothed edges make this a safe choice. They come in robust 8mm thickness and are sturdy enough to be free-standing with only a single clamp for support. They are 500 mm high and come in three common desk depths, 600, 700 and 800mm or can be customised to suit.

Product codes & dimensions:

FDACR0605 8 x 500(h) x 600(w)   FDACR0705 8 x 500(h) x 700(w)   FDACR0805 8 x 500(h) x 800(w)
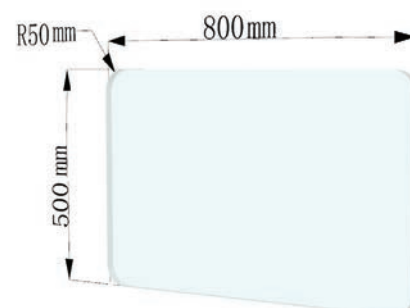

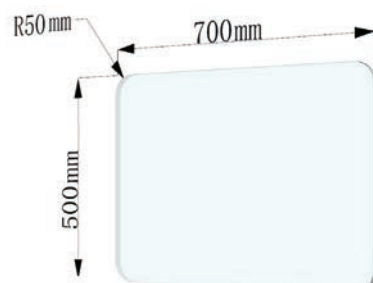

DESK MOUNT CLAMP
Fixed

To mount our Interdesk screens we offer compact desk- mounted clamps. Easy to fit and easy to adjust to securely hold your Acrylic screen in place. Available in silver. Desktop mount requires screwing to desk ; one per 500mm in length (min 2)

Product Code: FDPETCLAWH

GOLF CLAMP
Removable

Fore! Sure it looks like a tiny golf club, but it's unlikely to improve your game. However it is highly likely to improve your working space and peace of mind. The clamp mounts to the front edge of your desk to mount a screen to provide a barrier between you and your workmates in a shared desking set-up. Removeable/ relocatable. Golf clamp to the edge of the desk, one required

**Product Code:** AWMGCLAWH

4 WAY ACRYLIC DIVIDERS
Together but separate

This simple screen set is free standing and turns a 4 sided table into individual pods. Comes with rounded corners and smooth edges. These two panels simply slot together and sit on a desktop or tabletop. Each panel measures 5mm thick x 600mm high x 1200mm wide. Ideal for offices, schools, libraries, or any place people meet to talk. Allow people to collaborate, not contaminate. Makes pods 600mm x 600mm.

Product Code & Dimensions:
FDACR1212 5 x 500(h) x 1200(w) Each panel
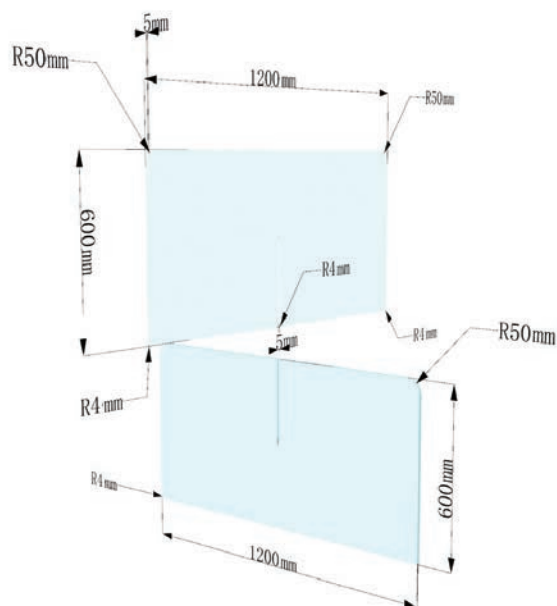

PARTITION TOPPERS

Extend your partitions upwards with custom acrylic barriers. Using unique mounting brackets we can increase the height of your existing cloth partitions by adding an upper layer of acrylic to maintain the current sight lines in the office while reducing concerns. Sizes to order and available to suit a range of cloth partition thicknesses. One mount per 500mm in length (min 2).

FDCLMNS

MOUNTING BRACKET

LOOKOUT SNEEZEGUARDS
For face to face interactions

Simply breathing and speaking can expel droplets which may contain contagious diseases, singing and shouting even more so. However the real champions at spreading diseases are coughs (up to 3000 droplets) and sneezes (upwards of 100,000 droplets).
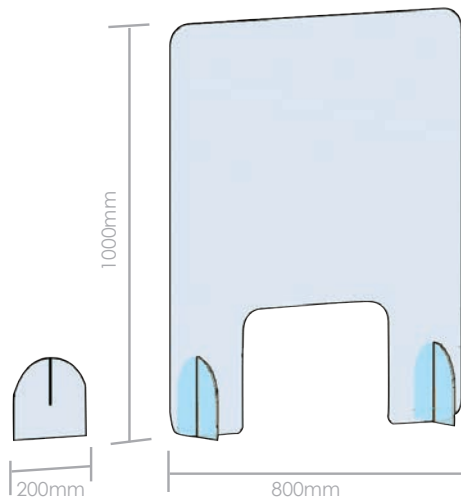

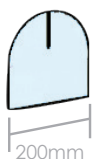

Lookout Sneezeguards are made of 5mm crystal clear acrylic and are designed for face to face interaction and to limit contact. They simply slot together and sit on the desktop, no assembly or installation required.

ICE SCREENS

Made from double layer translucent polycarbonate these screens are lightweight, simple to install and look great. They afford some privacy as well as being a cough barrier between workers.

Fully framed in aluminium they add a professional and more permanent look to the office. There are a range of permanent and temporary fixing alternatives to suit and desk or table top.

Icescreens provide the right balance between social distancing, privacy and team collaboration. Simple to install and simple to keep clean.

A wide range of standard sizes is available, including:

800(w) x 500(h) generally used at the side of a desk

900(w) x 500(h) generally used at the side of a desk

1200(w) x 500(h) generally used at the back of a desk

1400(w) x 500(h) generally used at the back of a desk

1500(w) x 500(h) generally used at the back of a desk

1600(w) x 500(h) generally used at the back of a desk

1800(w) x 500(h) generally used at the back of a desk

Custom sizes can also be made on lead times.

FIXINGS FOR ICE SCREENS

We have a range of mounts which can provide quick temporary or more permanent solutions:

(A) ICESCREEN HEAVY DUTY CLAMP
2 per screen

This desk clamp is a heavy duty fitting solution which is clamped and tightened at the edge of any desk. Expandable to fit desks/desk frames up to 95mm.

(B) ICESCREEN COMPACT CLAMP
2 per screen

Compact Clamp fits between two opposing desks to situate a screen in the centre. Fit desk edges up to 45mm.

(C) ICESCREEN SCREW-DOWN MOUNTING PIN
Requires screwing to the desk

Mounted Pin can be placed at any point on the surface of a desk to mount selected screens. 2 Mountingpins are needed to hold the 1 screen and are fixed with screws.

**(D) ICESCREEN HAMMER IN MOUNTING PIN**
Requires nailing through the desk

Pin is designed to penetrate through a desk top. This solution becomes completely hidden under the selected screen.

D: FIWPIN

E-SCREEN
FULL-HEIGHT FLOOR MOUNTED
## Acrylic Screens - Made To Order

Fully separate desks or traffic areas while maintaining sight lines within the office.
Using a robust aluminium frame and a choice of mobile or fixed feet these screens are shatter resistant and easy to keep clean. They are also effective in noise reduction.

Product Code & Dimensions:

They can be jointed together to form 2 , 3 and even 4 way connections.
Sizes to order.
Product Code: EFSFACRNS
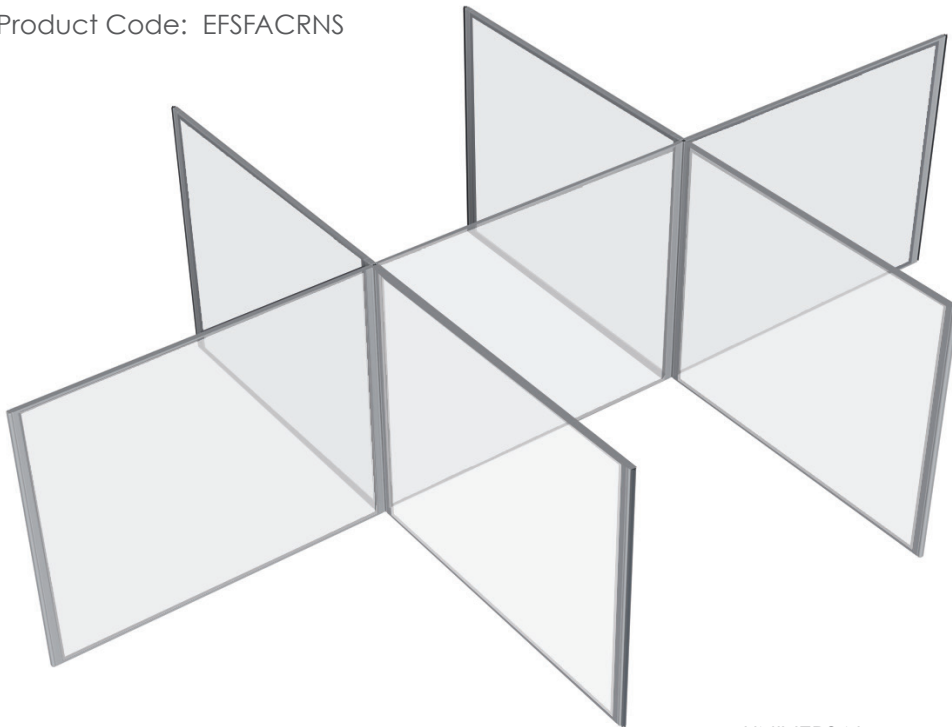

*Can also be specified as half-glazed with a fabric covered lower section

UNIVERSAL JOINING POST

OFFICE CONFIGURATIONS

Users can quickly and simply remove the universal joining post and change
the configurations of their screens. Because there is only one basic universal joining post, you can change the entire layout of your office without needing
extra parts or expert help. Join 2 way, 3 way or 4 way at any right angle all
with the same joiner.
Each floor screen comes with the universal joiner at one end. There is no need to specify or lock into a particular configuration.
As soon as you create a 90 degree corner e-screens become stable and freestanding, for creating long straight runs we recommend either a small 'return' piece or bracing to existing furniture with optional brackets. e-SCREENS are slightly elevated with an adjustable glide allowing for height adjustments in out of level floors and to create a cable pass-through.
