

### A Digital Recording Solution to Meet Your Dictation Requirements.

Whether you're a business executive, journalist, or secretary, whether you're recording in the office or in the field, you'll appreciate the exceptional operation ease and superior sound quality.

#### Digital Voice Recorder DS-2400

An all-round dictation unit that uses removable memory media

##### High-Quality Recording with Easy Operation

The DSS Pro file format assures high-quality voice recording. Large pushbuttons optimally arranged in the middle of the front panel assure simple, intuitive operation. To enhance usability, frequently used functions can be assigned to three customizable Smart buttons.

##### SD/SDHC Memory Card Compatible

The built-in SD/SDHC card slot gives you real media versatility. In addition to the provided SD card, you can expand the recording capacity by adding commercially available SD/SDHC cards.

##### Large Backlit LCD

The large LCD panel features a backlight that illuminates its large, easy-to-read window in the dark, making it easy to see and read status and operation information.

#### PC Transcription Kit AS-2400

Powerful add-on tool makes transcription work easy

##### Enhanced workflow integration

Smooth, hassle-free transcription and distribution assures higher business productivity. The DSS Player software makes it easy to send sound files to transcriptionists via e-mail or FTP. Finished documents are sent back automatically.

##### AS-2400 Transcription Kit

Includes DSS Player Standard software, RS27 Foot switch, E102 Headset, USB cable, and Serial cable.
